Legend

Please locate your printer model. The corresponding icon will indicate which product can be used in your printer.

5 Prints up to 4" or 5" on a 5" web (material width).
TEC472M • TEC572M • TECSX4M • TECSX5M

4 CG408 Printer and WS4 printer

10 Prints up to 4" or 5" on a 10" web (material width).
TXP3-4 • TXP3-5 • TXPSX5 • TXPSX4

7 Prints up to 6.5" on a 7" web (material width).
Fits most SATO printers. Print width may vary.

Thermal Printing (T)

Thermal printing is a system whereby heating of ribbon transfers print onto the surface of the print material.

Print Charges

	1-Side	2-Side
Print less than 1"	\$9.00/M	\$17.25/M
Print 1" or greater	\$12.50/M	\$23.00/M
End to End, Laser and Pressure Sensitive	Quote	Quote

Setup Charges

Straight Line Copy	\$2.50/var.	
Logo setup from provided artwork	\$35.00/ea.	
Logos and Artwork	\$60.00/hr.	
UPC Code or Barcode	\$2.00/M	*Quantities per variety not ordered in increments of 1000, will be subject to a charge of \$2.50 per variety. 500 min per variety.
Quantity increment charge*	\$2.50/var.	
Consecutive Numbering	\$10.00/M	
Print color other than Black	\$5.00/M	

Hot Stamping (H)

Hot stamping is a dry printing method in which a heated die and foil are used to apply graphics to a surface.

Print Charges

	1-Side	2-Side
Print less than 1"	\$9.00/M	\$17.25/M
Print 1" or greater	\$12.50/M	\$23.00/M

Setup Charges

Straight Line Copy Engraving	9.00/ea.	
Logo / Artwork Engraving	\$35.00/ea.	
Artwork Charge	\$60.00/hr.	
UPC Code or Barcode	\$2.00/M	*Quantities per variety not ordered in increments of 1000, will be subject to a charge of \$2.50 per variety. 500 min per variety.
Quantity increment charge*	\$2.50/var.	
Consecutive Numbering	\$10.00/M	
Imprint Color other than Black	\$5.00/M	

Flexographic Printing (F)

Often abbreviated to flexo, this is a method of printing most commonly used for packaging. A flexo print is achieved by creating a mirrored master of the required image as a 3D relief in a rubber or polymer material. A measured amount of ink is deposited upon the surface of the printing plate (or printing cylinder) using an anilox roll. The print surface then rotates, contacting the print material which transfers the ink.

Print Charges

Flexo printing - Call for quotation.

Setup Charges

Plate Setup Charges may apply

PMS colors - Additional \$75.00 charge for colors not listed.

<http://horticulture.satoamerica.com/software.aspx>

Choosing the right software package is essential to meeting the requirements of your on-demand label printing program. We'll help you analyze your needs, assist with installation, make modifications to your database, and ensure the settings are correct for your label printing process. Ask us about software and updates. CD available upon request.

TAGGIT® Pro Labeling Design Software and Database

Whether you need to print bar codes, text, graphic images, color pictures or from a database, TAGGIT® Pro has the features to help you design and print tags and labels with ease. • Microsoft ready • Batch printing • Full-featured database construction capabilities • Utilize TrueType fonts, bar codes, preset formats for all our labels and graphics capabilities • Free phone support 704-644-1660 • Includes plant database designed by our company with over 4500 records. This includes Annuals, Perennials, Trees and Broadleaf Shrubs, and is totally editable to add additional varieties or information.

Item No.	Qty Pack	Description	List Price
TAG12PROF	1	TAGGIT® Pro Labeling Software	\$495.00
CD charge	1	CD charge	\$25.00

TXPSX Thermal Printer

The TXPSX models contain the features that make them the best-seller in the horticultural market. The rugged powder-coated industrial strength steel case is designed for harsh environments, yet still attractive for office or store settings. These printers easily handle material thickness up to 24 mil at speeds up to 10" per second. They are available with 5" (300 dpi) print heads with 10" tag width allowance. The TXPSX models come standard with USB, Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). Ethernet connectivity is available as an option.

Item No.	Qty Pack	Printer Weight	List Price	U/M
10 TXPSX5	1	63 LB	\$4,145.00	EA

Item No.	Description	List Price	U/M
SX1056	Thermal Printer Core Adaptor	\$75.00	EA
TEC9004-R	Ethernet Port Option (TXPSX5, TECSX5M)	\$395.00	EA

TECSX Thermal Printer

The TECSX models contain the same features as the TXPSX models however they handle up to 5" tag width. This unit is ideal for tags, labels and signs up to 5" wide. Utilizing the End-To-End Slip-On® tags, various pot tags, signs, and pressure sensitive labels makes this the most versatile printer for the money on the market. The TECSX models come standard with USB, Parallel Port, Serial Port, Ribbon Save Mode, and a FETHER head (floating edge type head revolution). Ethernet connectivity is also available as an option.

Item No.	Qty Pack	Printer Weight	List Price	U/M
5 TECSX5M	1	60 LB	\$3,545.00	EA

CG408 & WS-4 Thermal Printer

The CG408 and WS-4 desktop printers are a great complement to our SX model line of printers. The CG408 can print up to 4" wide at (203 dpi), up to 4 ips. The WS-4 can print up to 4.09" wide at (203 or 300dpi), up to 6 ips. These printers are designed primarily for thinner gauge materials, such as pressure sensitive adhesive labels, our TT End-to-End Slip-On® tags, and also our ZX pot stakes. The CG408 and WS-4 offers a lower cost addition to help reduce changeover time for customers using different types of media. Optional Argox unwinder (59-C2103-011/\$29.00MSRP)

Item No.	Qty Pack	Printer Weight	List Price	U/M
4 CG408TT	1	8 LB	\$695.00	EA
4 WS408TT	1	5.5 LB	\$575.00	EA

CLNX™ Series Thermal Printer

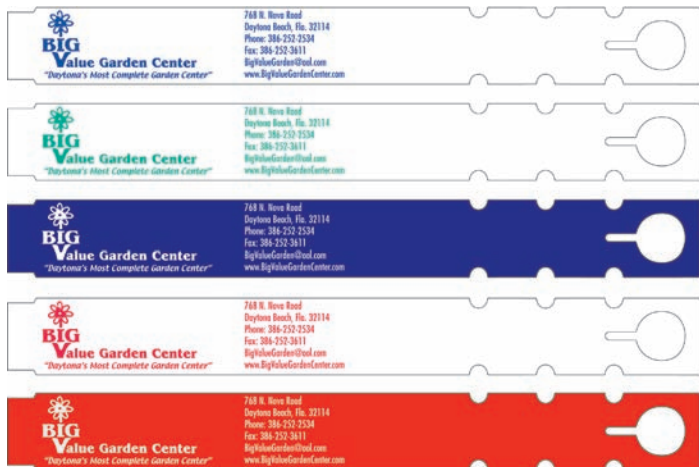

A revolutionary industrial class of thermal printers utilizing SATO's innovative user design philosophy featuring an easy to use platform for the most demanding customer application and environments.

Preinstalled operational videos viewed on a full color LED screen make training, setup and operation exceptionally easy. Other product key features include; 60° high lift print mechanism for simplified media and ribbon loading, coreless ribbon take up, multiple on-board interface connectivity, collapsible bi-fold side access cover for tight print locations, Energy Star compliant, available in 4" and 6.5" wide models- IDEAL for tags, RFID tags, labels, and signage. **Call your SATO Authorized Master Reseller for compatible ribbons, tags, labels and additional information.**

Quickly Design and Print Barcode Labels Without IT Help

Get started and finished with label design today. The NiceLabel® designer delivers a familiar Microsoft Word-like user experience. This means anyone can quickly design professional labels without previous knowledge of barcoding or designer training. [Learn more about label design.](#)

Print accurately and consistently without printing errors. Printing labels with dynamic data is different from printing other types of documents. The labeling system needs to enable production and warehouse staff to print quickly and without errors. NiceLabel® comes with an all-in-one printing form that helps users print accurate labels without the risk of error. [Learn more about error-free label printing.](#)

Flexible and efficient.

Where Versatility Meets Value

Horticulture Tag and Label Printer

Workplace environments require **flexibility** and a **compact footprint** to support changing label and tag printing needs.

The **WS4 thermal printer** handles full size rolls of stock (1" core with 5" OD rolls) and 984.2' ribbon. Print width is 4" wide with 203 dpi or 300 dpi resolution at speeds up to 6" per second. Optional Argox Unwinder (59-C2103-011 / \$29.00 MSRP) sold separately for rolled stock larger than 5" OD.

Standard Printer Features

- 🔍 Auto Sense Emulations
- 🔍 984.2' Ribbon Length
- 🔍 Space Saving Foot Print
- 🔍 Easy Load Media
- 🔍 Ethernet, R232 and USB A/B*

*Optional Bluetooth or WLAN

Superior Outdoor Materials

- 🔍 Slip-On® Tags: 1" x 10" and 3/4" x 7"
(Available in 12 Colors)
- 🔍 Pot Tags: 1" x 4 1/2" and 1/2" x 3"
(13 mils Thick)
- 🔍 Labels: Wide Selection for Plug Trays,
Pots and Cartons

Thermal Slip-On® End to End Tags Low Density Polyethylene (TX, TT) 10 mil

Our Thermal Slip-On® tags are a great way of identifying your product. Once locked, it will stay on the plant material until removed. Thermal print adheres to the surface for years, and will not fade away. The dry printing process means tags are ready to use as they come off the printer. Our Thermal Slip-On® tags can be preprinted flexographically during the manufacturing process or with the thermal transfer printing method.

Thermal Pressure Sensitive Signs Floratherm (FT)

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The signs can be applied to smooth damp containers, flats, and trays with excellent results. Signs may be preprinted with decorative borders and your company name or logo. Signs can also be flood-coated to create additional color options.

Thermal Pressure Sensitive Labels Floratherm (FT)

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The labels can be applied to smooth damp containers, flats, and trays with excellent results. Our thermal pressure sensitive labels can be preprinted flexographically during the manufacturing process or with the thermal transfer printing method. Labels are wound in.

Clear and Block-out Labels

All of the below label sizes are also available in a Clear Synthetic (Plastic) or with Block-out Adhesive. Clear labels are commonly used to place variable data on custom printed picture tags in an attractive manner. Block-out adhesive labels are designed to cover up whatever is behind the label. If you need to re-price or change a bar code, the Block-out Adhesive label will not allow the original information to show through. If you are interested in either application, please call your SATO Authorized Master Reseller for a quote. Minimum quantities will apply.

Thermal Transfer Pressure Sensitive Paper Labels

SATO's Thermal Transfer Pressure Sensitive Paper Labels have many uses. The face sheet is thermal receptive and can also be flood coated in various colors to be used in case labeling and for product identification in warehouses. The high quality face sheet is coupled with an aggressive, permanent adhesive to insure long term adhesion of the label. If direct thermal printing is the preferred print method, SATO also offers direct thermal pressure sensitive paper labels for various applications. Let SATO fill all your pressure sensitive paper label needs.

Custom Preprinted Tags

Tags designed using a company logo or a specific marketing need. Preprinted tags can later be thermally imprinted with a UPC, price, or other variable information.

Preprinted

Custom preprints can be produced using information, logos, or graphics that will appear on all tags of an order.

Imprintable

Once printed, these tags can be imprinted with a thermal printer, and then be ready to use immediately.

Flexo Printed

Tags are produced via Flexographic Printing with up to 3 colors.

Think SATO for all of your label needs.

Pressure-sensitive labels, tickets, and tags

- Full range of paper, film, and adhesive options
- Up to 7 colors including 4-color process
- Computerized ink system
- Spot and full coverage water and UV varnish
- Full and pattern adhesive coating
- Inline lamination and Integrated Forms
- Tamper-evident labels
- Complete prepress capabilities
- Packaged in rolls, fan-fold, sheets, or stacks

Valueline Laser Printable Slip-On® Tags Laser Material 5 mil

The Valueline Laser Printable product is a 5 mil material that is top coated on both sides to provide superior imaging and longevity outdoors. Our Valueline is viable for all of your monochrome laser printing applications, but is also a solution to most of your color printing applications as well. This economically priced laser printable material can cover almost all of your laser printing needs. Our laser Slip-On® tags may be preprinted with information such as company name, website and logo for maximizing company visibility.

SATO Horticultural RFID Solutions

RFID Tagging is an ID system that uses radio frequency for object identification and tracking purposes.

A radio frequency identification (RFID) system includes:

- An RFID tag – an antenna with an integrated circuit, IC for data storage and communication with the RFID reader.
- A read/write device
- A host application for data collection, storage, processing and or transmission.

RFID uses radio waves to automatically identify and track the tags containing electronically stored information attached to plants or inserted into pots.

The SATO RFID solution allows growers to track and store data about their products. Fitting every shelf, row or plant with a RFID tag, growers will be able to monitor stages and progress of potentially every plant in a greenhouse.

Beyond the greenhouse, shipping containers with RFID identification will enable tracking, from the crop to the market.

In addition to tracking, a RFID system provides information such as place of origin or date of harvest.

T-Stakes and Injection Molded Stakes

T-Stakes are produced from 30 mil white polystyrene for easy insertion into most soil. They may be purchased blank or preprinted in one or two colors. Our fade resistant pens found on page 28 can be used also to write on these stakes.

Injection Molded Stakes are made of heavy-duty plastic from 55 mil to 70 mil thicknesses. These stakes are sturdy enough to be inserted into most mediums. Surfaces accept writing with fade resistant marking pens. (See pg. 28)

Pressure Sensitive Labels are available for most injection molded stakes. Please see pages 14 and 15 for appropriate labels.

Ringer and Rings

The ringer has revolutionized the auto-ringer market with its "pneumatic-like" action and ease of use. From balling and burlapping, to tagging of pots, this tool puts affordability with quality. The "D" shaped ring creates a triangle "△" when attached.

RINGER "△"

G7 Auto Ringer and Rings

The application of the self-feeding principle to the familiar hog ring plier meets a need that all users of this fastening method have been waiting for. The auto ringer cuts operating time and costs, and increases savings and profits. A very useful tool on every job within the range of this staple size. The SR8GPL rings for the G7PL are galvanized. The "C" shaped ring creates a circle "○" when attached.

Custom printed tree wraps, 10" x 12" and 10" x 18". Printed up to three colors featuring your company logo, care information, and planting instructions. Just wrap and staple, no messy glue strips to contend with.

Simply SATO

Economical tags that offer the combination of variably imprinted information with preprinted graphics and custom branding.

On Demand Printing Provides Flexibility

- Adjust item pricing to impact sales
- Add store branding messages
- Include product descriptions to match your stock

Secure Attachment

Clip tag to elastic band, plant stem, info stick, or hang from string for quick and simple display.

Simple Price Removal After Purchase

Perforation allows customer to remove the price after purchase. Perfect for gifts!

Eye-catching Designs Help Move Inventory

Custom branding and logos can be added.

Care Instructions Ensure Long Plant Life

Care instructions printed on the back of tag, will help your customers take proper care of floral items.

Renewable Resource

All natural paper stock

SATO has developed several stock designs and can produce custom preprinted logos or layouts. The Simply SATO tags are designed with both the retailer and the consumer user in mind and are bright, eye-catching, contain a wealth of information, and are simple to use. Retail customers will be attracted to products with the Simply SATO tags attached and purchase products for everyday or special occasions where they may not have otherwise. In addition, the tags offer retailers an economical means to enhance the image of their product and increase sales.

The Economy – A SATO Brand Story

Before 1953, “state-of-the-art” plant identification was a white plastic stake and a magic marker. Then along came Economy Label Sales – inventor of the Slip-On® tag. While the technology awed and amazed, decades later it became even more impressive when Economy introduced thermal printed plant tags, a process which truly transformed the landscape of horticulture marketing.

Meanwhile in Japan, Yo Sato, who established SATO in 1940 to manufacture and sell packaging machinery, was developing his own innovative technologies including one of the first hand labelers in 1962 and the world’s first thermal transfer label printer in 1979. Today, SATO America manufactures innovative, reliable auto-identification systems and offers complete solutions to businesses by integrating hardware, software, media supplies and maintenance services.

From the beginning, both companies were on parallel paths to leadership in their respective industries: Economy in horticulture and SATO in printing solutions.

Over the years, tagging and labeling has grown to critical proportion for horticulture production and marketing requirements. Today, tracking, shipping, merchandising, marketing and the transactional accounting of plant material are synonymous with profitability.

So, it seems only natural that two industry leaders would come together under the Horticultural Division of SATO America, LLC.

And the rest is history. Economy Labels & Tags – a SATO Brand – specializes in developing and perfecting the solutions that help retailers and growers to flourish, including but not limited to:

- Slip-On® Tags, Pot Tags, Labels, Signage
- Affordable Thermal Printers and Software
- And much more

Need a QR code or a MS Tag? We can help.

QR Code is a matrix barcode (or two-dimensional code), readable by QR scanners, mobile phones with a camera, and smartphones.

The code consists of black modules arranged in a square pattern on white background. The information encoded can be text, URL or other data.

Codes can be customized to link to any page on your website.

MS Tag or Microsoft Tag is an implementation of HCCB using 4 colors in a 5 x 10 grid. Additionally, the code works in monochrome. The print size can be varied to allow reasonable reading by a mobile cameraphone; for example, a Tag on a real estate sign might be printed large enough to be read from a car driving by, whereas a Tag in a magazine could be smaller because the reader would likely be nearer.

A Microsoft Tag is essentially a machine readable web link, analogous to a URL shortening link: when read, the Tag application sends the HCCB data to a Microsoft server, which then returns the publisher’s intended URL. The Tag reader then directs the user’s mobile browser to the appropriate website, not unlike how CueCat operated. Because of this redirection, Microsoft is also able to provide Tag analytics to publishers.
