Thermal Printing (T)

Thermal printing is a system whereby heating of ribbon transfers print onto the surface of the print material.

Print Charges	1-Side	2-Side
Print less than 1"	\$9.00/M	\$17.25/M
Print 1" or greater	\$12.50/M	\$23.00/M
End to End, Laser and Pressure Sensitive	Quote	Quote

Setup Charges

Straight Line Copy	\$2.50/var.
Logo setup from provided artwork	\$35.00/ea.
Logos and Artwork	\$60.00/hr.
UPC Code or Barcode	\$2.00/M
Quantity increment charge*	\$2.50/var.
Consecutive Numbering	\$10.00/M
Print color other than Black	\$5.00/M

*Quantities per variety not ordered in increments of 1000, will be subject to a charge of \$2.50 per variety.

500 min per variety.

Hot Stamping (H)

Hot stamping is a dry printing method in which a heated die and foil are used to apply graphics to a surface.

Print Charges	1-Side	2-Side
Print less than 1"	\$9.00/M	\$17.25/M
Print 1" or greater	\$12.50/M	\$23.00/M

Setup Charges

Straight Line Copy Engraving	\$9.00/ea.
Logo / Artwork Engraving	\$35.00/ea.
Artwork Charge	\$60.00/hr.
UPC Code or Barcode	\$2.00/M
Quantity increment charge*	\$2.50/var.
Consecutive Numbering	\$10.00/M
Imprint Color other than Black	\$5.00/M

*Quantities per variety not ordered in increments of 1000, will be subject to a charge of \$2.50 per variety.

500 min per variety.

Flexographic Printing (F)

Often abbreviated to flexo, this is a method of printing most commonly used for packaging. A flexo print is achieved by creating a mirrored master of the required image as a 3D relief in a rubber or polymer material. A measured amount of ink is deposited upon the surface of the printing plate (or printing cylinder) using an anilox roll. The print surface then rotates, contacting the print material which transfers the ink.

Print Charges Flexo printing - Call for quotation.

Setup Charges Plate Setup Charges may apply

PMS colors Additional \$85.00 charge for colors not listed.

TXPSX Thermal Printer

The TXPSX model printer is the best-seller in the horticulture industry. The TXPSX can easily handle material thicknesses up to 24 mil at speeds up to 10 inches per second. The TXPSX is available with a 5-inch print head and can print tag widths up to 10 inch ladder style (sideways). This print orientation promotes faster throughput and maximizes ribbon usage. The TXPSX models come standard with USB, Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). Ethernet connectivity is available as an option.

SX1056	Thermal Printer Core Adapter	\$75.00	EA
TEC9004-R	Ethernet Port Option (TXPSX5, TECSX5M)	\$395.00	EA

TECSX Thermal Printer

The TECSX model printer is ideal for tags, labels and signs up to 5 inches wide. Utilizing the End-To-End Slip-On® tags, various pot tags, and pressure sensitive signs, makes this the most versatile and cost-effective printer in the Horticulture market. The TECSX model comes standard with Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). USB and Ethernet are available options.

WS4 Thermal Printer

The WS4 desktop printer is a great complement to our SX model line of printers. The WS4 can print up to 4.09" wide at (203 or 300dpi), up to 6 ips. This printer is designed primarily for thinner gauge materials, such as pressure sensitive adhesive labels, our TT End-to-End Slip-On® tags, and also our ZX pot stakes. The WS4 offers a lower cost addition to help reduce changeover time for customers using different types of media. Optional Argox unwinder (59-C2103-011/\$29.00MSRP)

Quickly Design and Print Barcode Labels Without IT Help

Get started and finished with label design today. The NiceLabel designer delivers a familiar Microsoft Word-like user experience. This means anyone can quickly design professional labels without previous knowledge of barcoding or designer training. [Learn more about label design.](#)

Print accurately and consistently without printing errors. Printing labels with dynamic data is different from printing other types of documents. The labeling system needs to enable production and warehouse staff to print quickly and without errors. NiceLabel comes with an all-in-one printing form that helps users print accurate labels without the risk of error. [Learn more about error-free label printing.*](#)

WHERE VERSATILITY MEETS VALUE

Horticulture Tag and Label Printer

Workplace environments require **flexibility** and a **compact footprint** to support changing label and tag printing needs.

The **WS4 thermal printer** handles full size rolls of stock (1" core with 5" OD rolls) and 984.2' ribbon. Print width is 4" wide with 203 dpi or 300 dpi resolution at speeds up to 6" per second. Optional Argox Unwinder (59-C2103-011 / \$29.00 MSRP) sold separately for rolled stock larger than 5" OD. *

STANDARD PRINTER FEATURES

- 🔍 Auto Sense Emulations
- 🔍 984.2' Ribbon Length
- 🔍 Space Saving Foot Print
- 🔍 Easy Load Media
- 🔍 Ethernet, R232 and USB A/B*

*Optional Bluetooth or WLAN

SUPERIOR OUTDOOR MATERIALS

- 🔍 Slip-On® Tags: 1" x 10" and 3/4" x 7"
(Available in 12 Colors)
- 🔍 Pot Tags: 1" x 4 1/2" and 1/2" x 3"
(13 mils Thick)
- 🔍 Labels: Wide Selection for Plug Trays, Pots and Cartons

*Free NiceLabel edition with limited functionality, exclusively for use with WS4 printers. No database support.

Thermal Slip-On® End to End Tags

LOW DENSITY POLYETHYLENE (TX, TT) 10 MIL

Our Thermal Slip-On tags are a great way of identifying your product. Once locked, it will stay on the plant material until removed. Thermal print adheres to the surface for years, and will not fade away. The dry printing process means tags are ready to use as they come off the printer. Our Thermal Slip-On tags can be preprinted flexographically during the manufacturing process or with the thermal transfer printing method.

Thermal Pot Tags

STYRENE MATERIAL (ZX) 13 MIL (WHITE MATERIAL ONLY),
STYRENE MATERIAL (SX) 20 MIL, HEAVY PLASTIC MATERIAL (PX) 23 MIL

Our Thermal Pot Tags can be preprinted using thermal transfer (all materials listed), hot stamping (all materials listed), and flexo (ZX 13mil Styrene only). Thermal print adheres to the surface for years, and will not fade away. The dry printing process means tags are ready to use as they come off the printer.

Styrene Material (ZX) and Styrene Material (SX) 

Heavy Plastic Material (PX)

Thermal Pressure Sensitive Signs

FLORATHERM (FT)

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The signs can be applied to smooth damp containers, flats, and trays. Signs may be printed with decorative borders and your company name or logo. Signs can also be flood coated to create additional color options.

Thermal Pressure Sensitive Labels

FLORATHERM (FT)

Floratherm material is an aggressive adhesive, top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The labels can be applied to smooth damp containers, flats, and trays. These labels can be pre-printed flexographically during the manufacturing process or with the thermal transfer printing method. Labels are wound in.

Clear and Block-out Labels

The label sizes below are also available in a Clear Synthetic (Plastic) or with Block-out adhesive. Clear labels are commonly used to place variable data on custom printed picture tags. Block-out adhesive labels are used to cover up what is behind the label. If you need to re-price or change a barcode, the Block-out Adhesive label will not allow the original information to show through. If you are interested in either application, please call your SATO Authorized Master Reseller for a quote. Minimums may apply.

Thermal Transfer Pressure Sensitive Paper Labels

The face sheet is thermal receptive and can be floodcoated in various colors to be used in case labeling and for product identification in warehouses. The high-quality face sheet is coupled with an aggressive, permanent adhesive to ensure long-term adhesion of the label. If direct thermal printing is the preferred print method, SATO also offers direct thermal pressure sensitive paper labels for various applications.

Custom Preprinted Tags

Tags designed using a company logo or a specific marketing need. Preprinted tags can later be thermally imprinted with a UPC, price, or other variable information.

Flexo Printed

Tags are produced via Flexographic Printing with up to 3 colors.

Preprinted

Custom preprints can be produced using information, logos, or graphics that will appear on all tags of an order.

Imprintable

Once printed, these tags can be imprinted with a thermal printer, and then be ready to use immediately.

THINK SATO FOR ALL OF YOUR LABEL NEEDS.

Pressure-sensitive labels, tickets, and tags

- Full range of paper, film, and adhesive options
- Up to 7 colors including 4-color process
- Computerized ink system
- Spot and full coverage water and UV varnish
- Full and pattern adhesive coating
- Inline lamination and Integrated Forms
- Tamper-evident labels
- Complete prepress capabilities
- Packaged in rolls, fan-fold, sheets, or stacks

SATO Horticultural RFID Solutions

RFID Tagging is an ID system that uses radio frequency for object identification and tracking purposes. A radio frequency identification (RFID) system includes:

- An RFID tag – an antenna with an integrated circuit, IC for data storage and communication with the RFID reader.
- A read/write device
- A host application for data collection, storage, processing and or transmission.

RFID uses radio waves to automatically identify and track the tags containing electronically stored information attached to plants or inserted into pots.

The SATO RFID solution allows growers to track and store data about their products. Fitting every shelf, row or plant with a RFID tag, growers will be able to monitor stages and progress of potentially every plant in a greenhouse.

Beyond the greenhouse, shipping containers with RFID identification will enable tracking, from the crop to the market.

In addition to tracking, a RFID system provides information such as place of origin or date of harvest.

T-Stakes and Injection Molded Stakes

T-Stakes are produced from 30 mil white polystyrene for easy insertion into most soil. They may be purchased blank or preprinted in one or two colors. Our fade resistant pens found on page 36 can be used also to write on these stakes.

Injection Molded Stakes are made of heavy-duty plastic from 55 mil to 70 mil thicknesses. These stakes are sturdy enough to be inserted into most mediums. Surfaces accept writing with fade resistant marking pens. (See pg. 36)

Pressure Sensitive Labels are available for most injection molded stakes.

Please see pages 18 and 19 for appropriate labels.

Ringer and Rings

The ringer has revolutionized the auto-ringer market with its "pneumatic-like" action and ease of use. From balling and burlapping, to tagging of pots, this tool puts affordability with quality. The "D" shaped ring creates a triangle "△" when attached.

G7 Auto Ringer and Rings

The application of the self-feeding principle to the familiar hog ring plier meets a need that all users of this fastening method have been waiting for. The auto ringer cuts operating time and costs, and increases savings and profits. A very useful tool on every job within the range of this staple size. The SR8GPL rings for the G7PL are galvanized. The "C" shaped ring creates a circle "○" when attached.

10" Wide x 12" Tall (Flat) 5" Wide x 12" Tall (Folded)

Tree Wraps - Custom

Custom printed tree wraps, 10" x 12" and 10" x 18". Printed up to three colors featuring your company logo, care information, and planting instructions.

Just wrap and staple, no messy glue strips to contend with.

Simply SATO

Economical tags that offer the combination of variably imprinted information with preprinted graphics and custom branding.

On Demand Printing Provides Flexibility

- Adjust item pricing to impact sales
- Add store branding messages
- Include product descriptions to match your stock

Secure Attachment

Clip tag to elastic band, plant stem, info stick, or hang from string for quick and simple display.

Simple Price Removal After Purchase

Perforation allows customer to remove the price after purchase. Perfect for gifts!

Eye-catching Designs Help Move Inventory

Custom branding and logos can be added.

Care Instructions Ensure Long Plant Life

Care instructions printed on the back of tag, will help your customers take proper care of floral items.

Renewable Resource

All natural paper stock

SATO has developed several stock designs and can produce custom preprinted logos or layouts. The Simply SATO tags are designed with both the retailer and the consumer user in mind and are bright, eye-catching, contain a wealth of information, and are simple to use. Retail customers will be attracted to products with the Simply SATO tags attached and purchase products for everyday or special occasions where they may not have otherwise. In addition, the tags offer retailers an economical means to enhance the image of their product and increase sales.

Print Your Own Color Labels

It's easier and more cost-effective than ever.

If you've been considering printing your labels or signs in color, but have been putting the decision off because it was too expensive, it's time to reconsider. The cost of professional label printers and supplies has dropped significantly and it's now an economically-viable option for many customers.

Attach signs to racks inexpensively with a newly designed clip

APPLIES QUICKLY • HOLDS TIGHT • INEXPENSIVE

Whether you're a grower who ships to large retailers or a garden center that needs to display signs for your customers, the #RC35 plastic clip is the perfect solution.

Clips are packed 1,000 per bag. An order for 100,000 clips costs less than \$1,000. A single bag of 1,000 clips is only \$19.95. Lower prices for larger orders.

Texpak invented the plastic clip for apparel manufacturers over 50 years ago and designed the new #RC35 plastic clip specifically for racks used in the horticultural market. "If it clips, it's Texpak."

Invented, developed and available exclusively from Texpak, Inc., innovators in packaging since 1934.

Attractive Labels Increase Product Sales!

Which label is right for fruit, vegetables, and any horticultural product?

Full Color Label Options

Partial Pre-Printed

- We print most of your information such as your name, logo and address in full color
- You can choose virtually any size and shape label
- Labels come with a blank area for imprinting on-site
- You imprint item, product code, bar code or any thing you want in blank area

Partial pre-prints are ideal for companies that stock one label for many products and don't want to worry about running out of labels for a specific product. To the left is a label for Nourse Farms before and after printing.

Fully Pre-Printed

- Order as few as 1,000 labels
- Orders of different labels with the same shape can be combined for best pricing
- Ideal if you have just a few different labels

Using a fully pre-printed label is ideal when you are ordering large quantities of the same labels.

Self-Printed Full Color Labels

- Ultimate flexibility to print what you want when you want
- Price of full color printers is continuing to drop
- High quality printing and excellent resolution
- Ideal if you have constantly changing products and information on labels

Printing color labels yourself makes the most sense when you need small quantities of a variety of different labels.

130 New Hyde Park Road, Franklin Square, New York 11010

1-800-645-3416

Blank Labels

- Cost of labels is much less expensive than full or partially pre-printed labels
- Ability to print text, bar codes and graphics
- Most common sizes are in stock for immediate shipment
- Only one color can be printed. Usually black but color ribbons are available
- Certain special printers are available that can print two different colors

PRODUCT LABEL

To the right is an example of a one-color product label printed with a blue ribbon on a white label.

UPC BARCODES AND PRICES

Very often suppliers are required to affix a bar code, price or other information on the products they ship and sell. Our thermal printers and labels are excellent at this task. Information is usually printed on blank labels which can be either a custom color or white.

FSMA ALERT: With the new Food Safety Modernization Act (FSMA) in effect since 2017, it is critically important for fruit and vegetable growers to begin labeling their products according to the new rules. Texpak has been working with many customers to get them up to code and can work with your company to set you up for compliance.

The Economy - A SATO Brand Story

Before 1953, "state-of-the-art" plant identification was a white plastic stake and a magic marker. Then along came Economy Label Sales - inventor of the Slip-On® tag. While the technology awed and amazed, decades later it became even more impressive when Economy introduced thermal printed plant tags, a process which truly transformed the landscape of horticulture marketing.

Meanwhile in Japan, Yo Sato, who established SATO in 1940 to manufacture and sell packaging machinery, was developing his own innovative technologies including one of the first hand labelers in 1962 and the world's first thermal transfer label printer in 1979. Today, SATO America manufactures innovative, reliable auto-identification systems and offers complete solutions to businesses by integrating hardware, software, media supplies and maintenance services.

From the beginning, both companies were on parallel paths to leadership in their respective industries: Economy in horticulture and SATO in printing solutions.

Over the years, tagging and labeling has grown to critical proportion for horticulture production and marketing requirements. Today, tracking, shipping, merchandising, marketing and the transactional accounting of plant material are synonymous with profitability.

So, it seems only natural that two industry leaders would come together under the Horticultural Division of SATO America, LLC.

And the rest is history. Economy Labels & Tags - a SATO Brand - specializes in developing and perfecting the solutions that help retailers and growers to flourish, including but not limited to:

- Slip-On® Tags, Pot Tags, Labels, Signage
- Affordable Thermal Printers and Software
- And much more

Need a QR code or a MS Tag? We can help.

QR Code is a matrix barcode (or two-dimensional code), readable by QR scanners, mobile phones with a camera, and smartphones. The code consists of black modules arranged in a square pattern on white background. The information encoded can be text, URL or other data. Codes can be customized to link to any page on your website.

MS Tag or Microsoft Tag is an implementation of HCCB using 4 colors in a 5 x 10 grid. Additionally, the code works in monochrome. The print size can be varied to allow reasonable reading by a mobile cameraphone; for example, a Tag on a real estate sign might be printed large enough to be read from a car driving by, whereas a Tag in a magazine could be smaller because the reader would likely be nearer.

A Microsoft Tag is essentially a machine readable web link, analogous to a URL shortening link: when read, the Tag application sends the HCCB data to a Microsoft server, which then returns the publisher's intended URL. The Tag reader then directs the user's mobile browser to the appropriate website, not unlike how CueCat operated. Because of this redirection, Microsoft is also able to provide Tag analytics to publishers.
