

TEXPAK INC.

*The Leading Manufacturer
Of Plastic Clips Since 1948*

SNAP THE CODE
To View Our Full Line of Products

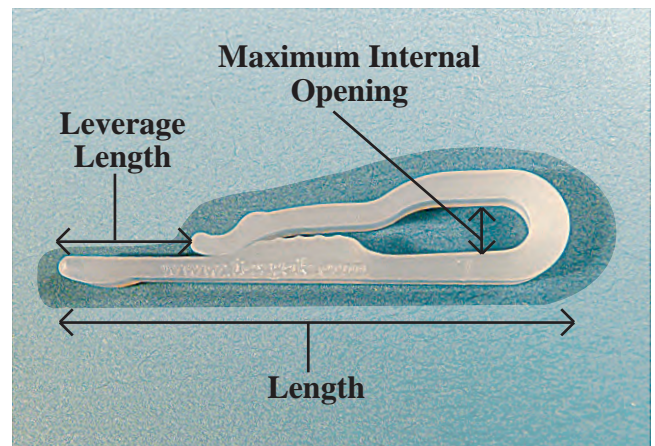

In 1948, Texpak introduced the first packaging clip and has remained the acknowledged leader in this field for over sixty years. In this fast-changing market, our numerous patents attest to our commitment to constantly maintain state-of-the-art quality, technology and value.

CLIP SPECIFICATIONS

Length: the overall length from the back of the clip to the tip of the long leg.

Leverage Length: the difference in length between the short and long leg of the clip. Since clips are generally applied by placing the long leg under the product and pushing upward, the longer the leverage length the easier it is to apply the clip.

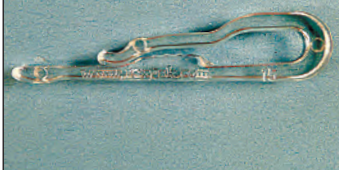

Maximum Internal Opening: the space at the back of the clip between the top and bottom leg. The larger the opening, the thicker product the clip can accommodate.

KAM CLIPS

KAM® #L

U.S. PAT. NO.3,119,163

Length: 1.45"
Leverage length: .40"
Maximum internal opening: .15"

Crystal clear. Raised kam with buttons makes clip slip resistant. Rigid material for tight hold on lightweight and slippery garments. Long leverage length makes this clip extremely easy to apply.

KAM® #H

U.S. PAT. NO.3,119,163

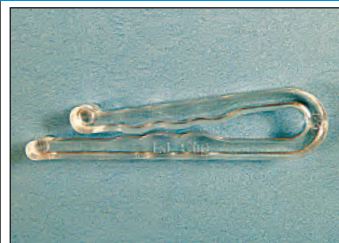

Length: 1.45"
Leverage length: .40"
Maximum internal opening: .15"

Opaque. Raised cam with buttons makes clip slip resistant. This clip is virtually unbreakable and is the best all-purpose clip. Very flexible, good holding on medium weights products. Long leverage length makes this clip extremely easy to apply.

J CLIPS

LJ CLIP

Length: 1.45"
Leverage length: .23"
Maximum internal opening: .16"

Crystal Clear. Similar in shape and function to the Long Jet Clip® manufactured by the Jet Clip Corporation* This clip has smaller ridges than the SJ clip so it makes less of an impression mark on soft products. Not as tight as the #SJ clip on thin products.

SJ CLIP

Length: 1.5"
Leverage length: .24"
Maximum internal opening: .18"

Crystal Clear. Similar in shape and function to the Super Jet Clip® manufactured by the Jet Clip Corporation* Interlocking teeth on the bottom and top surface provide holding power. Slightly tighter on thin garments than the Kam® Clip, but leverage length is shorter.

*Jet Clip® is the trademark of the Jet Clip Corporation. Texpak, Inc. has no affiliation with the Jet Clip Corporation.

SPECIALTY CLIPS

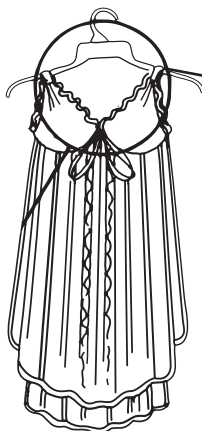

Pro® #82

U.S. PAT. NO.3,298,073

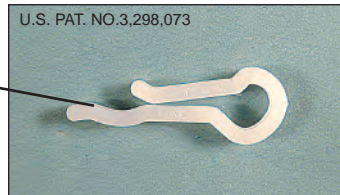

Length: 1.04"
Leverage length: .33"
Maximum internal opening: .16"

Crystal clear. Tightest and shortest clip available. Special clip ends for fast application. This is the best holding clip for thin products. Smooth sides minimize marks on merchandise.

Pro® #84

U.S. PAT. NO.3,298,073

Length: 1.04"
Leverage length: .33"
Maximum internal opening: .16"

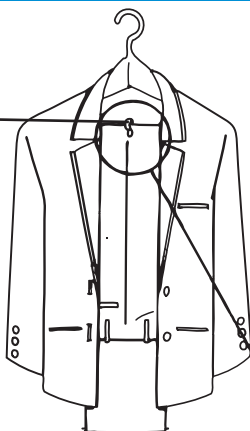

White. Shortest clip available. Unbreakable with patented loop design to lock over plastic hangers. Does not snag and minimizes marks on thin products.

#2PC

Length: 1.23"
Leverage length: NA
Maximum internal opening: .68"

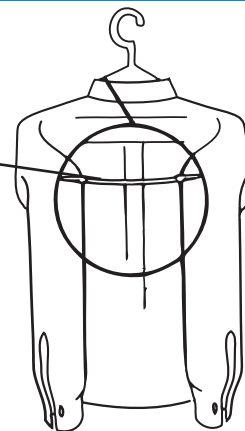

The primary purpose is to secure any type of apparel to wooden or heavy-duty plastic hangers.

#07 TIE BACK CLIP

White. Two plastic clips back to back with 3" elastic between clip. Used on the back of hanging shirts to present an attractive package. This is an extremely tight clip for secure holding on even the thinnest garments.

PT® CLIPS

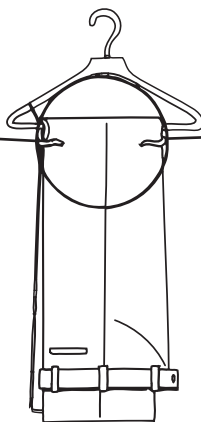

PT® #71

U.S. PAT. NO.3,766,613

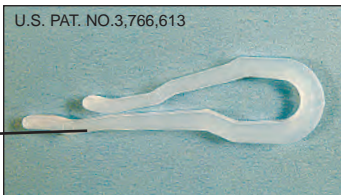

Length: 1.62"
Leverage length: .36"
Maximum internal opening: .22"

Clear. Legs longer than standard clips for further reach into garments with wider loop for quick pickup and application. Rigid material and three offset leg sections provide holding areas for thinner and medium weight garments.

PT® #72

U.S. PAT. NO.3,766,613

Length: 1.62"
Leverage length: .36"
Maximum internal opening: .22"

Opaque material and three offset leg sections provide holding area for medium and thick garments. Also used for hanger packing. Can accommodate slightly bulkier products than the PT #71 and is virtually unbreakable.

PT® #75

U.S. PAT. NO.3,766,613

Length: 1.83"
Leverage length: .37"
Maximum internal opening: .31"

Opaque. Longest leg and widest loop. Long legs extend holding area. For bulky garments as well as hanger packing.
