

ELEGANT CUSTOM SHIRTS DESERVE ELEGANT PACKAGING

THE *PERFEX™* CLIP ELIMINATES THE NEED FOR INEXPENSIVE LOOKING PLASTIC CLIPS AS WELL AS PINS, WHICH CAN DAMAGE THE FABRIC.

Texpak invented the Perfex™ Clip over 60 years ago. It was, and still is, used primarily on shirts to prevent damage caused by pins and to upgrade the appearance of expensive custom shirts. If you manufacture custom shirts and want a sophisticated image, you should be using the Perfex™ clip to keep your shirts neatly folded.

In recent years we have modified our design so that the clips are easier to apply than the competition's product, while still holding well on both thin and thick folded shirts. In short, the Perfex™ clip is the best of its kind on the market.

Made from stainless steel, the Perfex™ clip is available at an extremely competitive price. Please test the enclosed samples and we'll be happy to fulfill an order as small as a bag of 1,000 to prove that our Perfex™ clip is the best crisscross clip on the market.

Works great on thick shirts

Works great on thin shirts
